Shower in the Solar Savings

CSR

Time to get a Solar Hot Water System

The average Hot Water Service will account for around 25% of a household's energy bill. With high electricity prices predicted to remain for the next couple of years, along with ever increasing domestic gas costs, investing in the free power of the sun makes a lot of financial sense.

Sharpe has teamed up with Bradford CSR to offer you cutting edge solar hot water technology. Innovative lightweight components and frames allow for rapid, unobtrusive and hassle-free installation. Bradford Solar Hot Water Systems efficiently capture the sun's energy, leading to hot water cost savings of up to 70%. With the quality and experience of Bradford CSR, you'll also enjoy your new Solar Hot Water service with the added security of a 15 year guarantee*, with installation by experienced and licensed Sharpe Group technicians.

Bradford hot water
* Evacuated Tubes Guaranteed for 15 Years

Solar Hot Water is even more affordable with Certegy Ezi-Pay interest free payment plans. Everyone can easily enjoy the benefits of cheap and reliable hot water now!

Q: Will a Solar hot water unit cause problems for my roof?

A: Many conventional Solar Hot Water systems require a heavy water tank to be mounted on the roof, limiting the number of households that can have one without increased expenditure on strengthening their roofs. Bradford CSR Solar Hot Water systems remove this problem by utilising a lightweight and split system design. Rather than being mounted on the roof, a slimline tank is installed on the ground and water is then pumped up to the solar collector. This makes it suitable for nearly all roofs, whilst being quick and easy to install.

Signs and Symptoms: You need Bradford CSR

- Worried about dodgy systems and disreputable installers?
- Wanted Solar Hot Water but told your house wasn't suitable?
- Your current Hot Water service unreliable?
- Concerned about current or future energy bills?

Secret Savings

Many people are unsure about Solar Hot Water because they think an inefficient booster will limit the capacity to produce consistent and reliable hot water whilst also reducing any energy savings.

Bradford Solar Hot Water systems come with Rinnai Gas or Electric booster units. With a 6★ efficiency rating, you'll never run out of environmentally friendly hot water. Bradford CSR Solar Hot Water systems are still eligible for Small-Scale Technology Certificates. By using these, you can offset a significant proportion of the installation costs.

Select a Worry Free Plumbing & Hot-Water Inspection: \$187

- A Sharpe Plumber will ensure your Drains and Plumbing :
- 17 Point Check
 - Visual, Moisture and Camera Inspections
 - Moisture and Pressure Tests
 - Indoor and Outside Plumbing
